

Mimic = Act or imitate someone else

**Coral snakes are poisonous
Kingsnakes & Milk snakes aren't**

**Monarch butterflies taste very bad
Viceroy butterflies don't**

**Parasitic birds are birds that lay eggs in other species nests
When the parasitic bird nestlings open their mouths, their markings
inside their mouth mimic the other babies**

Which snake is which?

Red touch yellow, it will kill a fellow
Red touch black, it's a friend of Jack

Coral snakes are poisonous; Kingsnakes & Milk snakes aren't

Red touch yellow, it will kill a fellow
Red touch black, it's a friend of Jack

Is this a poisonous snake?
