Pierce County Biodiversity Network Lower White River 2007 Bioblitz at Selected Sites - Pacific

A Work in Progress of the Pierce County Biodiversity Alliance (PCBA)

(Pierce County Planning and Land Services, University of Washington, Washington Department of Fish and Wildlife, MetroParks Tacoma, Puyallup River Watershed Council)

What is Biodiversity Planning?

Biodiversity planning is a method used to identify land areas that provide for a biologically diverse representation of species. This planning method considers long-term ecosystem health and establishes a goal of maintaining adequate habitat to ensure the continued viability of a diversity of species within an ecoregion.

Lower White River BioBlitz June 3-4, 2006 and April 21, 2007

What is a BioBlitz? A rapid biological inventory of the plant and animal diversity found in a designated area during a 24-hour time frame.

Purpose

- To continue the implementation of conservation planning for the Biodiversity Network with landowners and experts to build enthusiasm around biodiversity preservation through open discussion and exploration with experts.
- To assess the quality of habitat and confirm species predicted within the Lower White River BMA.

Who was involved?

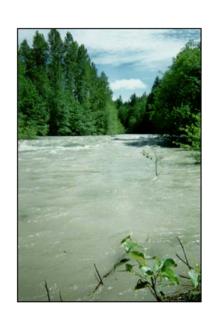

2006: Over 100 experts from natural resource agencies, universities, museums, Tahoma and Seattle Audubon, individuals with expertise on specific taxa, such as beetles, bats etc., volunteers, and landowners participated. The bioblitz was funded by a grant from the Washington Biodiversity Council.

2007: Twenty-five experts and volunteers spent 12 hours blitzing 3 sites: Auburn Wilderness Park, City of Pacific Park, and Pierce/King County Water Resources property. The bioblitz was funded by a grant from the Environmental Protection Agency.
