Naturemapping Journal

Name: Christina Date: 3-14-06

ANIMAL/PLANT NAME

Common Name: Batray

Scientific Name: *Myliobatis californica*

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

It's 6 feet wide and 200 Pounds.

It's in the sand. They're found shore to 150 foot depth range the Gulf of California.

Bat rays have heavy jaws, dark brown/black color, and a long whip-like tail.

They seek out inshore bays and sloughs.

Naturemapping Journal

Name: Snowy Egret + Daniela Date: 3/15/06

ANIMAL/PLANT NAME

Common Name: Snowy Egret

Scientific Name: Egretta thula

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

Length: 22-26 in.

Habitat: tree edge wetlands near shallow
fresh or brackish water.

Look: slim, white bird; filmy plumes (breeding);
black bill; legs black with bright
yellow feet.

OPUSSUM

Naturemapping Journal

Name: Diana Serra Date: 3/15/06 2006

ANIMAL/PLANT NAME

Common Name: opossum

Scientific Name: _____

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

Baby opossums, which weigh only
1/15 oz. at birth, live in
the mother's fur-lined pouch
about 3 months.

Naturemapping Journal

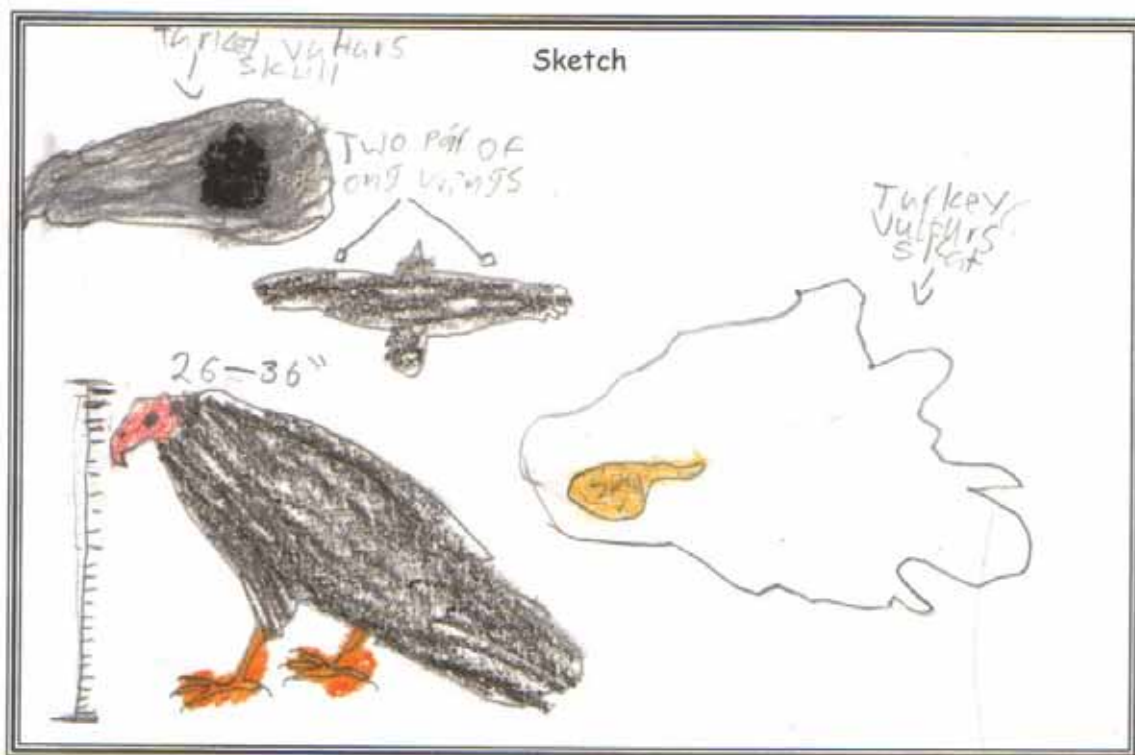

Name: Edwin Ortiz Date: 3/15/06

ANIMAL/PLANT NAME

Common Name: Turkey Vulture

Scientific Name: Cathartes aura

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

Habit: Turkey Vultures live in countries, woods, deserts, and tall hills.

Food: Turkey Vultures eat small mammals like mice, and rodents.

Voice: Turkey Vultures voice goes something like this grun-gron

Naturemapping Journal

Name: Emily Gutierrez Date: 3/30/06

ANIMAL/PLANT NAME

Common Name: Gray fox

Scientific Name: _____

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

It is as big like a Ringtail.

It eat meat.

It lives underground.

Naturemapping Journal

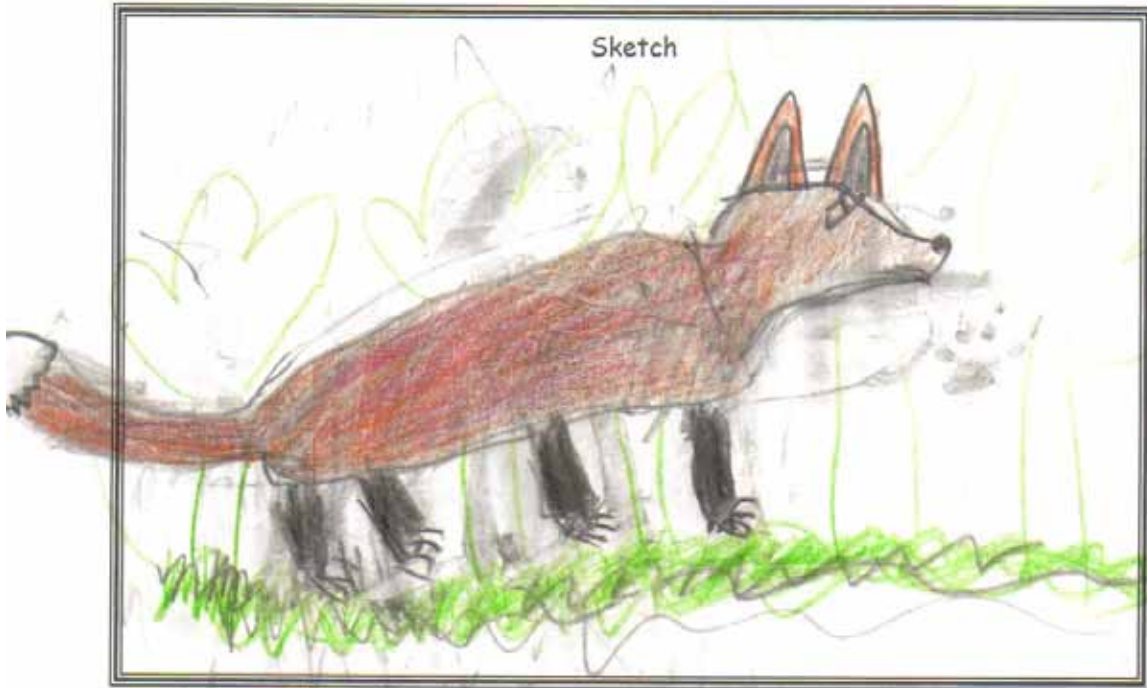

Name: Francisco J. Vazquez Date: 3/19/06

ANIMAL/PLANT NAME

Common Name: Red Fox

Scientific Name: Vulpes

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

Habitat: brush area in the forest, farm land
Eats: rodents, rabbits, birds, insects, berries, and
They are the best observed in early morning
and late in the afternoon usually reddish
on back and face, white on under parts
tail bushy, white tipped, black legs and feet

Naturemapping Journal

Name: Francisco Vargas Date: 3/29/26

ANIMAL/PLANT NAME

Common Name: Peregrine Falcon

Scientific Name: Falco peregrinus

Native or Non-native? (circle one)

Sketch

Facts of Life (How big? What does it eat? Where does it live?...)

The Peregrine can be recognized from other falcons by size (near a crow), pointed wings, long tail, "bluish gray above, with blackish "mustache" and barred whitish breast; immature brown above "mustache" and brown streaks below

Naturemapping Journal

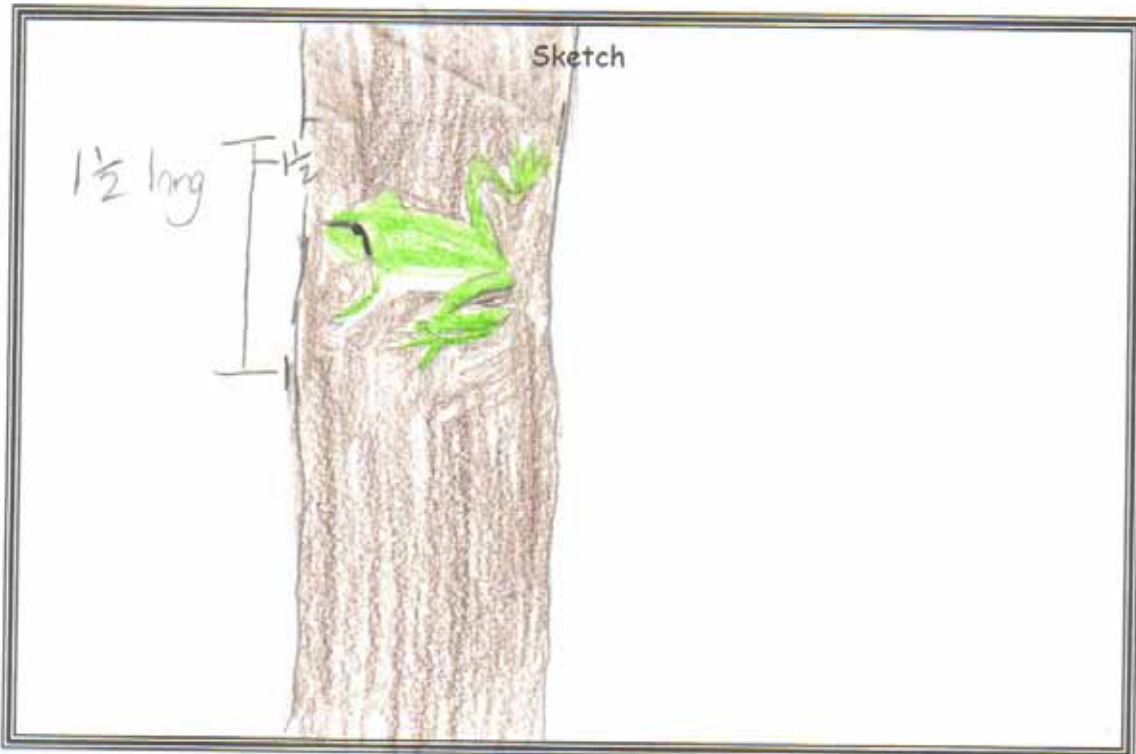

Name: Jonathan Nava Date: March 21, 2006

ANIMAL/PLANT NAME

Common Name: Pacific tree frog

Scientific Name: Pseudacris regilla

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

A Treefrog is 1 1/2 inches long it has a rough skin it's toes are lack webbing it sound is Kreek-eeek It's habitat is Rocks and near water

Naturemapping Journal

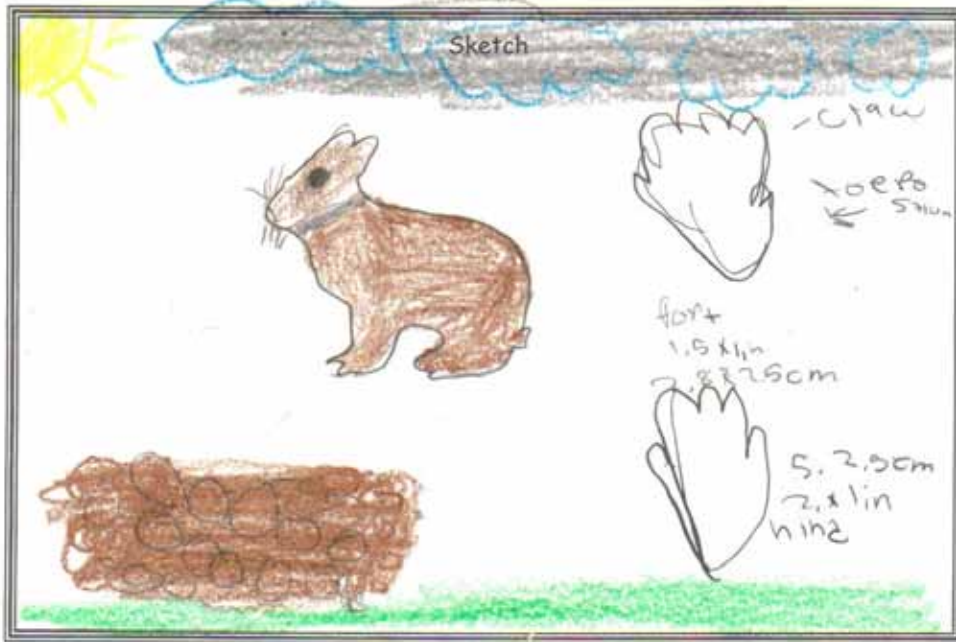

Name: Joshua Williams Date: 3/29/06

ANIMAL/PLANT NAME

Common Name: Brush Rabbit

Scientific Name: Sylvilagus bachmani

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?..)

Close proximity with humans living in cities, feeding on gardens, and lawns.

The eastern cottontail is as well known species in large range in the South over MAPs that of slightly larger marsh and swamp rabbit (24). the brush rabbit of the Pacific coast length:

11 to 12 in and the desert cottontail of the inland

west length 12 to 15 in are somewhat smaller species

brush cover hillsides the brush rabbit is a brown species found

Naturemapping Journal

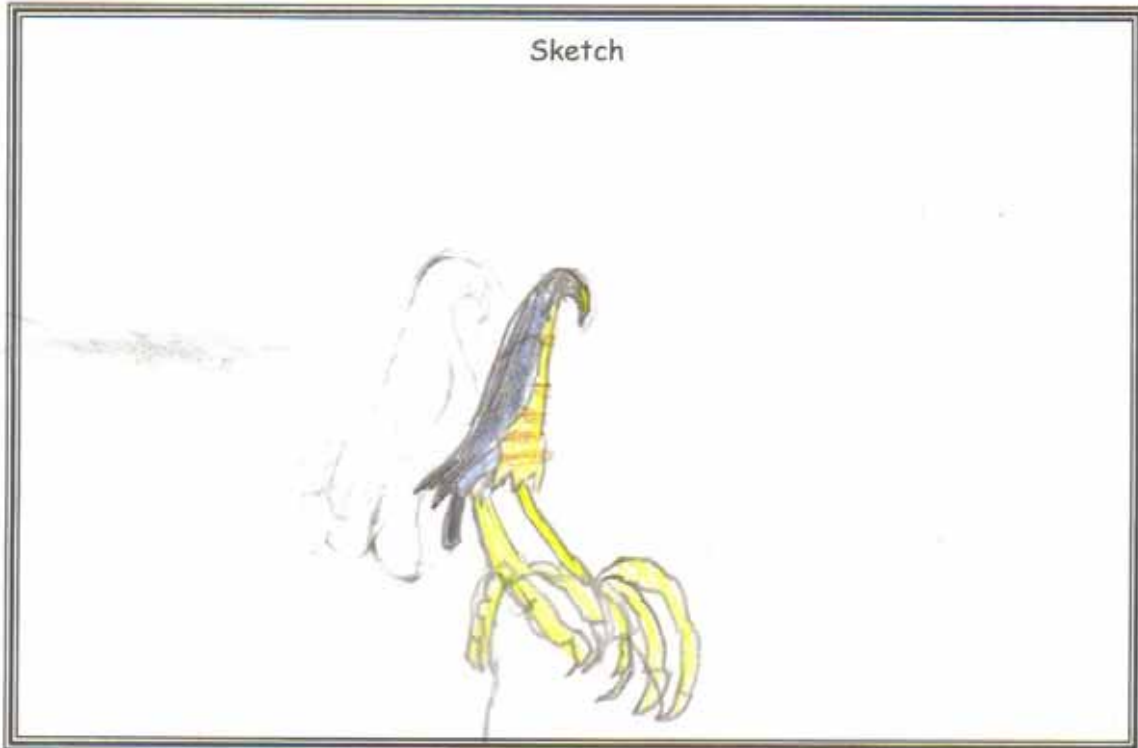

Name: MANNEL WURZ Date: 3/14/06

ANIMAL/PLANT NAME

Common Name: PEREGRINE FALCON

Scientific Name: _____

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

Most Peregrine Falcons dig a shallow
hole in gravel on a cliff ledge for their
nest. But some Peregrines have used,
tall towers, and skyscraper ledges, and
bridges for their nesting sites.

Naturemapping Journal

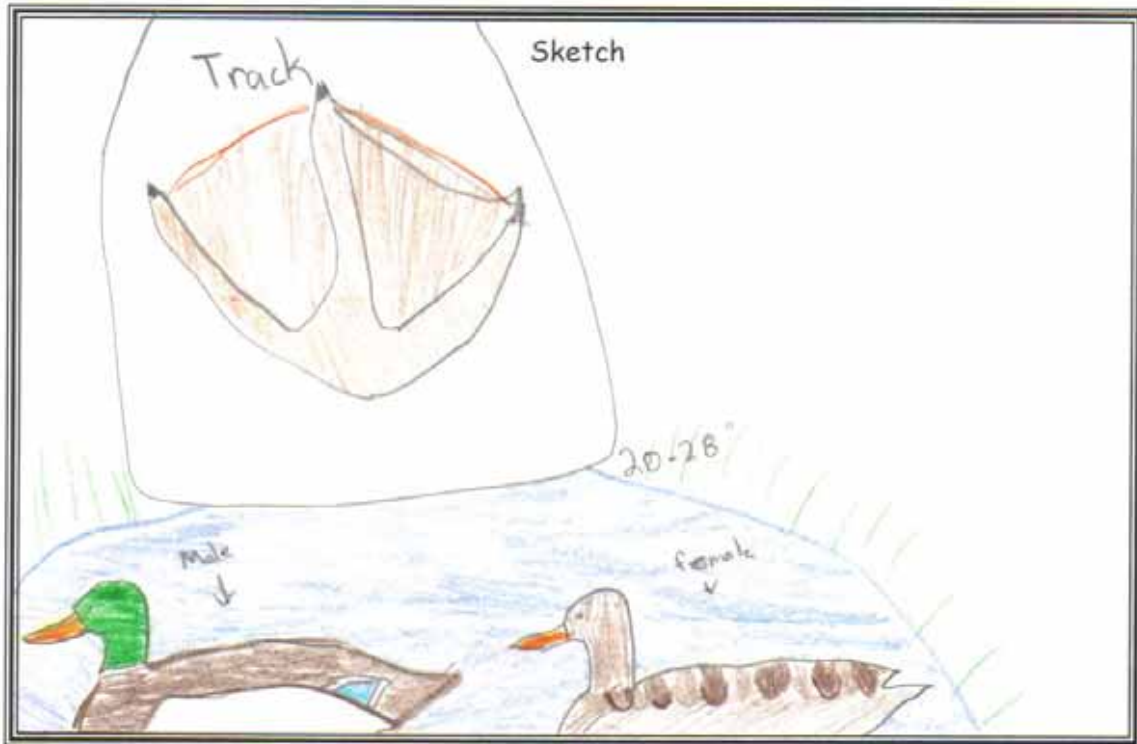

Name: Shammi Mading Date: 3/14/06

ANIMAL/PLANT NAME

Common Name: Mallard

Scientific Name: (Anas platyrhynchos)

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

The most commonly found duck in the world, the Mallard
numbers nearly 10 million in North America alone.
There habitat is in rivers, lakes, and marshes. Mallards feed
like surface ducks by sipping in water. A Mallard eats
pondweeds, wild rice and other seeds; aquatic insects. The
materials they use are reeds and grasses laid with down, there
located on ground among high grass on reeds, usually near water.

Naturemapping Journal

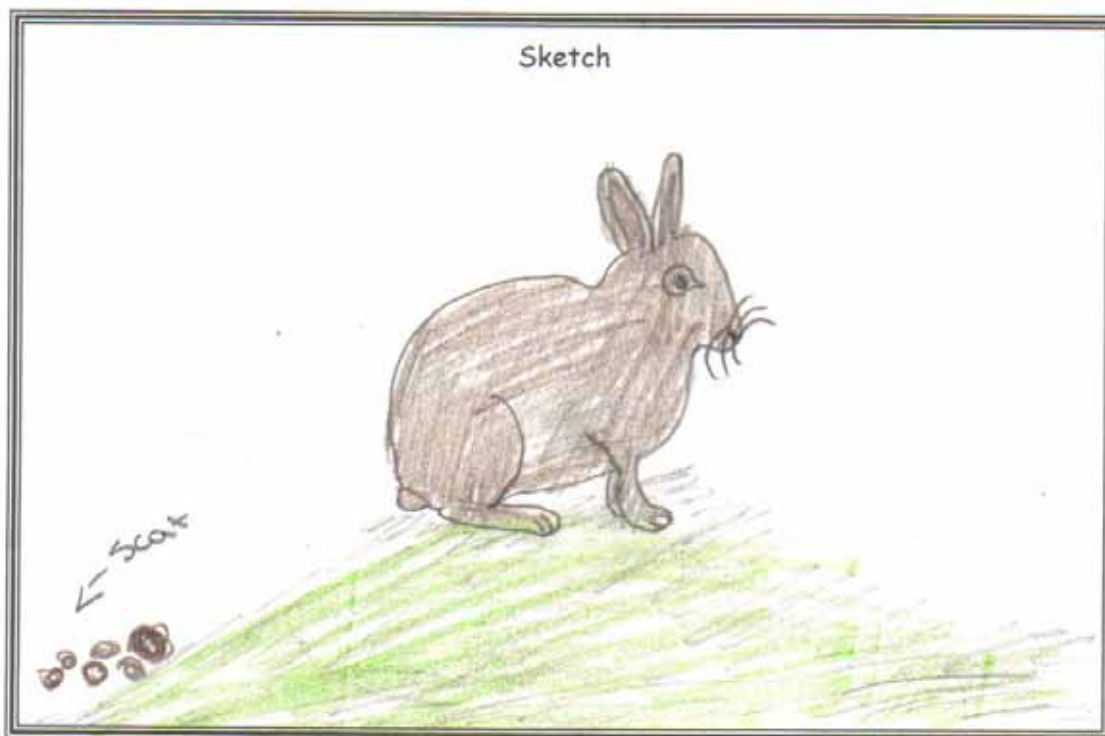

Name: Stephanie Guerrero Date: March 14, 2006

ANIMAL/PLANT NAME

Common Name: Brush Rabbit

Scientific Name: Sylvilagus bachmani

Native or Non-native? (circle one)

Facts of Life (How big? What does it eat? Where does it live?...)

A Brush Rabbit lives near the chaparral. They stay close to thickets that often clear vegetation to bare ground along edges. Their young born with short, fine hair, but blind; two to six per litter, some times three to four litters per year January to June.

facts of life.

it is 11 inches long.
native to north America
re hial almost hidd-
all. digs burrows for i
in cooler desert
environment

Naturemapping Journal
